Contents

Preface ix

PART I Introduction to DSGE modelling

Chapter 1 Introduction 3

Macroeconomic DSGE Modelling 5
DSGE software 8
Book organization 9
Bibliography 13

Chapter 2 The Canonical Dynamic Macroeconomic General Equilibrium model 15

Introduction 15
Households 18
Alternative functional forms for the utility function 26
The firms 26
Alternative functional forms of the production function 32
Model Equilibrium 32
Model Equilibrium (Competitive Equilibrium) 34
Model Equilibrium (Central Planning) 37
The Steady State 39
The Dynamic Stochastic General Equilibrium model 41
Equations of the model and calibration 43
Equilibrium equations 44
Calibration 45
Aggregate productivity shock 46
Conclusions 50

Bibliography 65

PART II Deviations from the Permanent Income-Life Cycle hypothesis

Chapter 3 Habit Formation 69

Introduction 69
Habit formation 70
The model 74
Households 74
The firms 77
Equilibrium 78
Equations of the model and calibration 79
Total Factor Productivity shock 80
Conclusions 82

Bibliography 85

Chapter 4 Non-Ricardian Agents 87

Introduction 87
Ricardian and Non-Ricardian Agents 88
The model 91
Ricardian Households 91
Non-Ricardian Households 93
Aggregation 94
The firms 94
Equilibrium of the model 95
Equations of the model and calibration 96
Total Factor Productivity shock 99
Conclusions 100

Bibliography 103

PART III Investment and Capital Accumulation

Chapter 5 Investment adjustment costs 107

Introduction 107
Investment adjustment costs 108

The model 111
Households 111
The firms 114
Equilibrium of the model 115
Equations of the model and calibration 115
Total Factor Productivity Shock 116
Conclusions 117
Bibliography 121
Chapter 6 Investment-Specific Technological Change 123
Introduction 123
Investment-specific technological change 124
The model 127
Households 127
The firms 129
Equilibrium of the model 130
The balanced growth path 130
Equations of the model and calibration 132
Investment-Specific Technological shock 134
Conclusions 135
Bibliography 139
PART IV The government
Chapter 7 Taxes 143
Introduction 143
Taxes 144
The model 147
Households 147
The firms 149
The government 150
Equilibrium of the model 151
Equations of the model and calibration 151
The Laffer curve 152
Taxes changes 158
Total Factor Productivity shock 160
Conclusions 161

Bibliography 167

Chapter 8 Public Spending 169

Introduction 169
Public spending 170
The model 172
Households 172
The firms 175
The government 175
Equilibrium of the model 176
An alternative functional form for aggregate consumption 177
Equations of the model and calibration 178
Public consumption change 179
Conclusions 181

Bibliography 187

Chapter 9 Public Capital 189

Introduction 189
Public capital 190
The model 193
Households 194
Firms 195
The government 196
Equilibrium of the model 197
Equations of the model and calibration 199
Public investment shock 202
Conclusions 203

Bibliography 207

PART V Time Decisions

Chapter 10 Human Capital 213

Introduction 213
Human Capital 213
The Model 215
Households 215
Firms 218
Equations of the model and calibration 219

Total Factor Productivity shock 220
Conclusions 221

Bibliography 225

Chapter 11 Home Production 227
Introduction 227
Home Production 228
The model 230
Households 230
The goods market sector 232
Home production sector 233
Household's maximization problem 234
Equilibrium of the model 235
Equations of the model and calibration 236
Total Factor Productivity shock 238
Conclusions 239

Bibliography 243

PART VI Imperfect competition

Chapter 12 Monopolistic Competition 249
Introduction 249
Monopolistic Competition 250
The model 252
Households 252
The firms 254
Equilibrium of the model 261
Equations of the model and calibration 262
Total Factor Productivity Shock 264
Conclusions 265

Bibliography 269
