1 Introduction to the <i>Handbook on Electricity Markets</i> <i>Jean-Michel Glachant, Paul L. Joskow and Michael G. Pollitt</i>	1
PART I TAKING STOCK: THE LEGACY	
2 Strengths and weaknesses of traditional arrangements for electricity supply <i>Richard Schmalensee</i>	13
3 Optimal wholesale pricing and investment in generation: the basics <i>Paul L. Joskow and Thomas-Olivier Léautier</i>	36
4 Wholesale electricity market design <i>Frank A. Wolak</i>	73
5 The evolution of competitive retail electricity markets <i>Stephen Littlechild</i>	111
6 Strengths and weaknesses of the British market model <i>David Newbery</i>	156
7 Strengths and weaknesses of the PJM market model <i>William W. Hogan</i>	182
8 ERCOT: success (so far) and lessons learned <i>Ross Baldick, Shmuel S. Oren, Eric S. Schubert and Kenneth Anderson</i>	205
9 Lessons from Australia's National Electricity Market 1998–2018: strengths and weaknesses of the reform experience <i>Paul Simshauser</i>	242
10 Strengths and weaknesses of the Nordic market model <i>Chloé Le Coq and Sebastian Schwenen</i>	287
11 The evolution of the European model for electricity markets <i>Fabien Roques</i>	308
PART II ADAPTING TO NEW TECHNOLOGIES AND NEW POLICY PRIORITIES	
12 New technologies on the supply side <i>Nils May and Karsten Neuhoff</i>	332

vi	<i>Handbook on electricity markets</i>	
13	New technologies on the demand side <i>Fereidoon Sioshansi</i>	353
14	Tools and policies to promote decarbonization of the electricity sector <i>Kathryne Cleary, Carolyn Fischer and Karen Palmer</i>	383
15	Shifting supply as well as demand: the new economics of electricity with high renewables <i>Richard Green</i>	408
16	The future design of the electricity market <i>Michael G. Pollitt</i>	428
17	New business models in the electricity sector <i>Jean-Michel Glachant</i>	443
18	Electrifying transport: issues and opportunities <i>Bentley C. Clinton, Christopher R. Knittel and Konstantinos Metaxoglou</i>	463
19	Electrification of residential and commercial heating <i>Mathilde Fajardy and David M. Reiner</i>	506
20	Harnessing the power of integration to achieve universal electricity access: the case for the Integrated Distribution Framework <i>Ignacio J. Pérez-Arriaga, Divyam Nagpal, Grégoire Jacquot and Robert Stoner</i>	540
21	Reforming China's electricity industry: national aspiration, bureaucratic empires, local interests <i>Xu Yi-chong</i>	568
22	The evolution of electricity sectors in Africa: ongoing obstacles and emerging opportunities to reach universal targets <i>Vivien Foster, Anton Eberhard and Gabrielle Dyson</i>	595
