Preface	xiii	
1 Introduction		1
Demography Defined	1	
Current Population Size and Composition	3	
Absolute Size, Distribution, and Density	3	
Composition	5	
Population Change	6	
Population Growth and Its Components	6	
Growth Components as Population Processes	8	
Population Change: Growth and Reclassification	11	
Population Problems	12	
Public Definition	12	
Population Problems in This Textbook	13	
Summary	14	
2 Demographic Data		17
Population Censuses	17	
Basic Features	18	
Census Topics	19	
Census Errors	21	
Evolution of the U.S. Census	23	
Coverage	24	
Census Geography	24	
Content	26	
Data Collection	28	
Processing and Publication	29	

Registration and Vital Statistics 30
 Evolution of Vital Statistics Systems 30
 Difficulties 31
 Population Registers 32
Sample Surveys 32
Demographic Estimation 33
 Why Estimates Are Needed 33
 Estimation of Historical Population Size 34
Summary 35

3 Population Growth

39

A History of Global Population Growth 39
 Premodern Growth, Before 1650 40
 Modern Explosion, 1650 to the Present 41
Classifying Countries 44
 The Development Dichotomy: MDRs and LDRs 44
The Prototypical European Demographic Transition 46
 Description 46
 Demographic Transition Theories 48
Differential Growth, 1950–2050 49
 Counts and Estimates, 1950 to 2005 49
 Projections, 2005 to 2050 52
 Projections as Predictions 53
Problems of a Changing World Distribution 54
Problems of Population Size 55
 Carrying Capacity and Density 55
 From Malthus to Marx to the Neo-Malthusians 56
 Global Overpopulation 59
 National Overpopulation 61
Problems of Growth Rates 63
 Too-Rapid Growth 63
 Too-Slow Growth 65
Summary 67

4 Age and Sex Structure

75

Describing Age-Sex Structure 75
 Quality of Census Data 75
 Describing Age Structure 77
 Describing Sex Structure 79
 Population Pyramids 80
Contrasts Between More-Developed and Less-Developed Countries 80
 Up to 2010 80
 Projected Changes to 2030 83
 Evolution of the U.S. Structure 83

How Structure Affects the Population Processes 88
 Mortality 88
 Fertility 90
 Migration 90
How the Population Processes Determine Structure 90
 Mortality Decline 90
 Fertility Decline 93
 Migration 95
Problems of Young Populations in the LDRs 97
 Development Concerns 97
 Social and Health Concerns 98
Problems of Old Populations in the MDRs 99
 Productivity of the Workforce 99
 Increasing Size and Visibility of the Elderly Population 101
 Old-Age Dependency 103
 The Future of Social Security 105
 Health and Capacity 106
 The Intergenerational Distribution of Wealth 106
 Intergenerational Perceptions and Structural Relations 107
Problems of Fluctuations in Cohort Size in the MDRs 108
 Institutional Problems 108
 Cohort Problems 109
Summary 110

5 Mortality

121

Measuring Mortality via Life Expectancy 121
 Counting Deaths 121
 Computing and Interpreting Life Expectancy 122
Historical Mortality Transitions 126
 Increases in Life Expectancy 126
 Proximate Causes of Death 129
 How Certain Proximate Causes of Death Were Avoided 132
Mortality Declines in the Less-Developed Regions 134
 Increases in Life Expectancy 134
 Decreases in Infant Mortality 135
 Proximate Causes of Death and Their Control 139
Sex Differences in Mortality in the More-Developed Regions 140
 Current Contrasts between
 More-Developed and Less-Developed Regions 140
 Explaining Superior Female Longevity in the More-Developed Regions 141
Problems of Mortality 143
 Defining Mortality Problems 143
 Problems of Stalled Mortality Transitions 144
 HIV/AIDS and Other Emergent Diseases 145
 Inequality of Persistent High Mortality 150
Summary 152

6 Morbidity and Health

163

- Why Demographers Study Morbidity 163
- Morbidity and Mortality in the Epidemiological Transition 164
 - Sources of Data 164
 - Two Underlying Causes 164
 - Infant and Child Health 167
- Modern Morbidity Data 167
 - Surveillance Systems and Registries 167
 - Health Surveys 168
 - Cause-of-Death Reports 168
- Measuring Morbidity 169
 - Morbidity Rates 169
 - Incidence and Prevalence of Leading Morbidity Causes 170
 - Age and Sex Patterns of Morbidity 172
- Morbidity Problems: Costs of Lost Life and Health 172
 - Years of Life Lost 173
 - Years of Health Lost 174
 - Years of Life and Health Lost 175
 - Health-Adjusted Life Expectancy 176
- Morbidity Problems: Risk Factors 178
 - Relative Importance 178
 - Malnutrition 179
 - Infant and Child Morbidity 180
 - Environmental Health 181
 - Unhealthy Lifestyles 181
 - Injuries 182
 - Frail Old Age 183
- Summary 183

7 Fertility

191

- European Fertility Transitions 192
 - Historical Demography 192
 - The Malthusian Transition 193
 - The Neo-Malthusian Transition 194
 - Causes of the Neo-Malthusian Transition: Some Theories 197
- Measuring Period Fertility 199
 - Getting Information about Births 200
 - Fertility Rates 201
 - Total Fertility Rates 202
 - General Fertility Rates 203
- Recent Fertility Declines 203
 - In Less-Developed and More-Developed Regions 203
 - Replacement-Level Fertility 204
 - Malthusian and Neo-Malthusian Components 206
 - Projections 206

Explaining Period Fertility Changes: The U.S. Case 207
 History of the U.S. Crude Birth Rate 207
 The Influence of Age Structure on Period Fertility 208
 The Influence of Cohort-Completed Fertility 210
 The Influence of Timing 212
 The Influence of Age Structure on Cohort Fertility 214
Explaining Cohort Fertility 215
 Explanation by Background 215
 The Proximate Determinants of Fertility 215
 Voluntary versus Involuntary Factors 216
Intercourse Variables 217
 Being in Sexual Unions 217
 Exposure within Unions 218
Conception Variables 219
 Involuntary Factors 219
 Breast-Feeding 220
 Contraception 221
Gestation Variables 224
 Involuntary Interruption 224
 Voluntary Interruption 225
Fertility “Problems” 227
 Fertility, Age Structure, and Population Growth: A Review 227
 Maternal and Child Mortality and Morbidity 227
 Unmet Contraceptive Needs and Unwanted Pregnancies 227
 Adolescent Fertility 229
Family-Planning Programs in the Less-Developed Regions 229
 The Goals of Family Planning 230
 Critics and Compromises 230
 The Health and Reproductive Rights Agenda 231
 Support for Family-Planning Programs 232
Summary 233

8 Marriage and Householding

243

Definition and Measurement 244
 Definitions 244
 Data on Marriage and Divorce 245
 Marital Status Composition 247
 Annual Rates 248
World Variations in First Marriage 249
 The First-Marriage Curve 249
 Current Variations among Less-Developed Countries 250
 Europe, Past and Present 256
 The United States, Past and Present 259
Marital Dissolution Trends in the United States 266
 Widowhood in the United States 266
 Divorce in the United States 268

x Contents

Family Life Course Trends in the United States 271
 Changes in Completed Family Life Courses 272
 Recent Changes in Timing of Marital Events 274
Which Marital Trends Are Problems? 275
Summary 277

9 Migration

287

What Is Migration? 287
 Which Moves Are Migrations? 287
 Which Dimensions of Migration Are Important? 288
Data Sources 290
 Administrative Records 290
 Registering Border Crossings 291
 Asking Retrospective Census or Survey Questions 291
 Estimating from Intercensal Growth 293
 Estimating Illegal Immigration 294
International Migration 295
 Prehistoric and Historic Variety 295
 Premodern Migration Streams, 1500–1965 297
 Modern Migration Streams 298
 Impact on Resident Populations 303
Internal Migration: The U.S. Case 304
 A Brief History of U.S. Interregional Migration 304
 Current Interregional Net Migration 305
 Effect of Population Age Composition 306
Determinants of Migration 308
 From Empirical Generalizations to Theories 308
 Migration Theories 310
Migration Problems and Policies 313
 Spread of National Policies 313
 Impact on Size and Growth Rates 315
 Impact on the Labor Force 316
 Impact on Social Composition 317
Immigration Policy: The U.S. Case 318
 A Brief History 318
 Recent Immigration Reforms 320
Summary 324

10 Urbanization

333

World Urbanization: Past, Present, and Future 333
 Definition and Measurement 333
 A History of Urbanization 334
 The Components of Urban Growth 337
 Regional Urbanization Trends 338
 City Size, Mega-Cities, and Urban Corridors 341

Urbanization "Problems" and Policies in the Less-Developed Regions 343

- Governmental Concerns 343**
- Out-Migration from Rural Areas 344**
- In-Migration to the Cities 344**
- Maldistribution of Cities 345**
- Reasons for Limited Migration Policy Success 345**

Urbanization "Problems" in the More-Developed Regions 348

- Urbanization and Counterurbanization in More-Developed Regions 348**
- Metropolitan Growth: The U.S. Case 349**
- Metropolitan "Problems": The U.S. Case 353**

Summary 356

II Population Diversity 363

Demographic Terminology 363

- Race, Ethnicity, and Ancestry 363**
- Definition and Measurement in the United States 364**

The Demography of U.S. Ethnic Groups 368

- Relative Growth 368**
- Age and Sex Structures 371**
- Mortality 374**
- Morbidity and Health 377**
- Fertility 379**
- Marriage 382**
- Migration 385**

Problems and Policies 388

- Urban Segregation 388**
- Inequities in Health 392**
- Higher Ethnic Group Fertility 393**
- Accommodating Ethnic Immigrants 393**

Summary 394

Glossary 403

Index 415
